

Print Reverse of an Array

```
import java.io.*;
class rearray
{
    public static void main(String S[])throws IOException
    {
        int a[]= new int[5];
        int i,temp,c;
        DataInputStream ins = new DataInputStream(System.in);
        System.out.println("Enter 5 elements");

        for(i=0; i<5; i++)
        {
            a[i]= Integer.parseInt(ins.readLine());
        }
        for(i=0; i<2; i++)
        {
            temp=a[i];
            a[i]=a[4-i];
            a[4-i]=temp;
        }
        for(i=0;i<5;i++)
        System.out.println(a[i]);
    }
}
```
