

Program to calculate area of rectangle

```
class rect
{
    int area(int l,int b)
    {
        return(l*b);
    }
}

class rectangle
{
    public static void main(String arg[])
    {
        rect r1=new rect();
        System.out.println("The area of rectangle is "+r1.area(5,7));
    }
}
```

Output:

```
C:\Documents and Settings\Administrator\Desktop\java\New Folder>java rectangle
The area of rectangle is 35
```
