

Program to find the sum of two numbers

```
class sum
{
    public static void main(String ar[])
    {
        int x,y,s;
        x=Integer.parseInt(ar[0]);
        y=Integer.parseInt(ar[1]);

        s=x+y;

        System.out.println("sum of " + x + " and " + y + " is " +s);

    }
}
```

Output:

```
C:\Documents and Settings\Administrator\Desktop\java\31-07>javac sum.java
C:\Documents and Settings\Administrator\Desktop\java\31-07>java sum 2 4
sum of 2 and 4 is 6
C:\Documents and Settings\Administrator\Desktop\java\31-07>
```
