

Sorting a String

```
import java.io.*;
class strngsort
{
    public static void main(String S[])throws IOException
    {
        String str= new String("Harpreet");
        int i,temp;

        a[i]= Integer.parseInt(ins.readLine());
    }
    for(i=0; i<4; i++)
    {
        if(a[i+1]>a[i])
        {
            temp=a[i];
            a[i]=a[i+1];
            a[i+1]=temp;
        }
    }
    for(i=0;i<5;i++)
        System.out.println(a[i]);
    }
}
```
