

Using of Vector Class

```
import java.util.Vector;
class vvvv
{
    public static void main(String s[])
    {
        Vector v =new Vector();
        v.addElement(12);
        v.addElement(19.5);
        v.addElement("AVVC");

        v.insertElementAt("pcte",1);

        System.out.println(v);
    }
}
```
